

GEARING UP FOR THE NEXT YEAR

Dear Parents,

At Chrysalis, all our thinking & ideation is centred around children. Though the year 20-21 had its own challenges, initiatives like vPTM, Chrysalis Curriculum Videos (CCVs), Augmented Reality Integration with curriculum, SciFest made us stand apart & kept the learning interesting despite teachers not having access to physical classrooms.

We are sure that we would see the smiling faces of our children at the school very soon. However, we do not believe in leaving anything to chance. Chrysalis team has been working for months now to plan various initiatives for the Academic Year 21-22. It gives us immense pleasure to share the initiatives we would be taking for our children in the forthcoming academic year to make

learning far more child-centric & engaging. Here is a list of few of those initiatives:

1. Increased number of Live and Interactive sessions with an optimisation on screen time.
2. Continuation of Chrysalis Curriculum Videos (CCVs) to give flexibility to children & avoid long hours of screen time.
3. Bridge Course for children at the start of the year to ensure recapitulation of concepts taught in previous year. Additional Support Classes for children who need it.
4. Live CHAMPS classes.
5. Regular assembly to bring a feeling of oneness & awareness.
6. Reading sessions to improve Language, Comprehension & Vocabulary.
7. Computer Science & Kannada classes.
8. Robotics & hands-on learning activities.

9. General Knowledge classes to ensure children know about happenings in the country & the world
10. Regular, live, one-on-one counselling sessions for children who need it.
11. Virtual field trips integrated with curriculum to enhance the learning outcomes.
12. Regular correction of children's work & feedback.

All the above has been planned, keeping in mind the age appropriateness & optimal screen time for our children.

Stay tuned. Detailed note will be shared shortly.

Thank you for your continued support!

Regards,

Principal
